

FAASTeam presents:

Loss of Control & Stall / Spin Awareness with Rich Stowell of SAFE

Loss of control remains a special emphasis area for the FAA, while loss of control culminating in an inadvertent stall/spin is on the NTSB most wanted list for 2015. Stall/spins account for 12% of general aviation accidents, but upwards of 20-25% of fatal accidents. Upwards of 20% of the fatal stall/spins occur with CFI's on board! Find out what you need to know to avoid stall/spin accident scenarios. Nine time Master Instructor Rich Stowell has performed more than 34,000 spins with students from around the world.

Interact with Rich as he gives you tools to improve your stall / spin awareness.

This event has a fee. For more information and to register, click here: <http://bit.ly/1xcsDhs>

Directions: See additional information below for registration.

Seating is limited to 50 participants

There is a fee for attending this webinar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
